

The page features decorative floral patterns in the corners. At the top left and top right, there are intricate line drawings of flowers and leaves. At the bottom left and bottom right, there are similar floral designs, including what appears to be a rose and other leafy branches. The word "PATCH" is centered in the upper half of the page.

PATCH

Patch NYC is a collaboration of two talented artists and designers- Don Carney and Jon Ross. We at Free People instantly fell in love with their one-of-a-kind pieces and are excited to feature them as one of our favorite designers! The Patch NYC collection is vintage inspired, but also maintains a strong contemporary look. To create their latest collection they experimented with a variety of metal finishing techniques to obtain a weathered quality that adds to their jewelry's character by giving it a rough edge. The collection features a collage of vintage pieces mixed with newer findings, using charms, stones and beads to create something special that is both modern and old, and undeniably unique.
